

# ARP Solar Panel Arrays

---

## ARP Custom Solar Panel Arrays\*

The ARP engineering team has engineered and developed our series of custom solar panel arrays to work optimally with ARPs' MPG and SPG system solutions. Each solar panel array is engineered specifically for our client's specific needs taking into account location, annual climate variation, and power demand requirements. The system is designed for ease of installation, maintenance, endurance and long life. It has been designed and tested to withstand 100 MPH hurricane force winds.

\* NOTE: ARPs Solar Panel Arrays are only sold as an option with ARPs MPG and SPG systems and are not sold separately.

Typical 25 kW Array Installation

Typical 5kW Array Installation
